

Program Overview

Mini Minds is a School Readiness Academy for children aged 3 – 5, designed to support a confident and supported transition into Kindergarten. Our program combines play-based learning with intentional teaching to build children's wellbeing, confidence, and foundational learning skills.

Every child learns in their own unique way.

At Mini Minds, we intentionally blend structured learning with purposeful play, hands-on experiences, and collaborative interactions to support each child's growth.

We believe:

- _ Learning should be engaging, joyful, and meaningful.
- _ Confidence and independence are just as important as academic skills.
- _ Play and exploration deepen understanding.
- _ Children flourish when they feel safe, supported, and seen.

A typical day at Mini Minds

Our days are thoughtfully structured to balance active learning, play, social connection and creativity. While routines remain flexible based on the group's needs, a typical day will include:

Literacy-focused learning: Activities such as modelled reading, circle time, letter and sound recognition, early writing experiences, and a strong focus on fine motor development and correct pencil grip.

Numeracy-focused learning: Engaging experiences like counting forwards and backwards, exploring counting collections, number recognition, hands-on mathematical tasks, subitising, and early addition and subtraction.

Fine Motor Skill Development: Intentional activities designed to strengthen hand muscles, coordination, and control to support writing readiness and everyday skills.

Morning Tea & Lunch Breaks: Unstructured outdoor free play and meaningful social interaction to build friendships, independence, confidence, and resilience.

Enrichment & Extra-Curricular Experiences: Creative Arts, Movement & Dance, Music, and Gross Motor sessions that support self-expression, coordination and confidence.
